My Aircooled! Ale & Elisa

**My Aircooled!  
Born in the USA**

The next contribution to "My Aircooled" is a very quaint one and it makes clear, that the best ideas originate from workaday life. Make way for Shorty!

I bought Shorty in 2009 in the centre of Italy. I saw him in the internet at night and I liked this little T2 because I've seen this kind of work on a Volkswagen only in the USA before!

I've only called the owner out of curiosity, and one week later I had the T2 on my farm!

I had to travel a hole day, drive 1400km through a lot of snow to pick up Shorty. But it was absolutely worth it because now he's the mascot of my shop.

Only little work and Shorty starts immediately because people see him.

The idea of a cutted T2 came originally from the winemakers who used this Volkswagen in the vineyards. The streets in the vineyard are very narrow, so it's necessary to spend a lot of time for ranking in the streets every time. The solution: A short VW! So you have no more problems driving through the vineyards.

The original number plate of Shorty was a the typic black Italian one. But because of my sympathy for the USA, I bought a new American with my identification number within my last travel through Florida.

Hope you enjoyed my story!

Kind regards

Elisa & Ale
